Answering Machine Short Manual

Recording and playing back a greeting/information text

A default greeting and a default information message are stored. You can customise the texts.

Example: Text for primary internal number

→ 6 1 1 1   1 = Greeting text   OK   OK   ♪   OK   OK
2 = Information text

| Select | Lift handset Confirm with OK | Recording starts | Record text | End recording | Play back recording |

Press →6121 to record and play back the text for the secondary internal number.

Switching the answering machine on and off

AM Activation function key   1 = AB off
2 = AB on - greeting text
3 = AM on - information text

Select

Without function key: →61121 - primary internal number, →61221 - secondary internal number

Viewing and listening to messages on your ST 30 AM

Mail key flashing - new message. Mail key lit steadily - old message already checked

✉   ◄ ►   Call list Answering machine   OK   ◄ ►   Example AM: Smith AM AM Memo Smith   OK

| Select | Confirm selection | Select | Confirm selection |

If there is only one call list or message for the answering machine, the "Select" option is not required; the call list or message for the AM is immediately displayed.

Functions during playback

You can enter commands to control the answering machine during playback.

▶	Listen to next message
◀	Listen to previous message or repeat current message from beginning
⬆ ▶	Listen to all the messages on the answering machine one after another
⬆ 🕩	The playback volume through the loudspeaker can be temporarily adjusted using the arrow keys ◀ ▶
1 or 2	"2": Temporary playback at double speed, "1": Normal playback
Clear	Clear displayed message
⬆ Clear	Clear all the messages from an answering machine
Stop	End playback/display
OK	The external or internal number shown on the display is dialled

Recording a memo

You can utilise your ST 30 AM as an acoustic notepad, such as to log phone conversations and to record memos or other verbal notes.
